NEVENA PANCIC

Software Engineer

+31638008669 nevenapancic97@gmail.com https://www.linkedin.com/in/pancic/
Amsterdam, Netherlands

SUMMARY

Full-Stack Software Engineer focused on building high-frequency, real-time web applications. Specialist in the **NestJS/Next.js** ecosystem, with a background in designing event-driven microservices using **GCP and PostgreSQL**. From architecting engines and LLM models to mentoring junior developers, I deliver high-performance digital products that solve complex business challenges.

EXPERIENCE

Full Stack Software Engineer

Miyagami — 08/2024 - Present — Amsterdam, Netherlands

Dutch Digital Agency

- **Architected a high-frequency trading engine** capable of processing **10,000+ transactions/second** using a **NestJS monorepo** architecture.
- **Engineered real-time market data synchronization** by integrating external streaming APIs via TLS sockets and Server-Sent Events (SSE).
- **Designed an event-driven system** using **Google Cloud Pub/Sub** to decouple microservices for financial settlements, liquidity management, and balance updates.
- **Developed a Next.js 15 frontend** utilizing **React Query** for server-state management and **Material-UI (MUI)** for a responsive, multi-tenant design.
- **Implemented advanced security protocols**, including JWT, Firebase MFA (TOTP), and scope-based authorization guards for service-to-service authentication.
- **Managed production databases** using **PostgreSQL and Drizzle ORM**, overseeing 15+ complex tables with automated migrations of production databases through **DBeaver** and **pgAdmin** 4.
- **Accelerated development velocity** using **Cursor**, **GH Copilot**, and **Claude (Anthropic API)** for AI-assisted coding and LLM-powered feature development, reducing boilerplate and speeding up delivery across the NestJS/Next.js stack.
- **Integrated CodeRabbit** for automated AI-powered code reviews on pull requests, improving code quality and reducing review turnaround time.
- **Enforced supply chain and vulnerability security** using **Aikido Security**, **GitHub Dependabot**, and **GitHub Advanced Security**, maintaining a hardened production codebase with automated dependency scanning and secret detection.
- **Built a custom AI model from scratch** using **Ollama** for local LLM inference, integrating it directly into the platform's infrastructure eliminating third-party API dependency and powering AI-driven features in production.

Full-Stack Web Development Teacher

Le Wagon — 03/2024 - 07/2024 — Amsterdam, Netherlands

Worldwide coding bootcamp

- Teach fundamental programming concepts, including **Ruby and database management**, to aspiring developers.
- **Providing personalized guidance**, helping students overcome technical challenges in **OOP, JavaScript, Ruby on Rails, and MVC architecture**.

Junior Software Developer

Web Space — 03/2024 - Present — Amsterdam, Netherlands

Creative development studio

- Developed web applications for diverse clients using **React and Next.js**.
- Applied **UI/UX design principles** to create intuitive and accessible user interfaces.
- **Developed a cross-platform mobile application** for a client using **React Native**, targeting both **iOS and Android** from a single codebase

High school professor of Biology

XIV Belgrade Grammer School — 02/2021 - 08/2021 — Belgrade, Serbia

- Delivered engaging biology lectures to students, focusing on making complex scientific concepts accessible and practical.

EDUCATION

AI Software engineer

Le Wagon

01/2024 - 03/2024

MSc Environment and Resource Management

Vrije University Amsterdam

09/2021 - 07/2022

GPA **8.5** / 10

MSc Environmental Policy

University of Belgrade

10/2020 - 07/2021

GPA **10** / 10

BSc Biology

University of Belgrade

10/2016 - 07/2020

GPA **9.3** / 10

SKILLS

JavaScript, React, React Native, Ruby on Rails, SQL, PostgreSQL, Ollama, Custom AI Model Development, Anthropic API, Local LLM Inference, Claude, GitHub, Git, TypeScript, Node.js, NestJS, React 18, Next.js, Drizzle ORM, Supabase, Firebase Firestore, Google Cloud Platform (Pub/Sub), Firebase Admin SDK, Vercel CI/CD, Event-Driven Architecture, WebSockets/SSE, RESTful API Design, Microservices, Jest, DBeaver
